COMPANY PROFILE

Safiflow Ventures Group

Water treatment technology for East Africa.

We design, build, install and service the systems that make water safe to drink.

Safi Treatment
our treatment systems

10 modules
matched to each water type

Made in East Africa
assembly today, manufacturing 2027

WHO WE ARE

A water treatment technology company.

Safiflow Ventures Group is based in Kampala, Uganda. We design, build, install and service water treatment systems that make water from town supply, boreholes, rivers, fluoride-rich and salty sources safe to drink.

We do not drill boreholes or lay pipes. We focus on treatment: the water test decides the system, and our ten standard modules are combined to match it.

Safi M in daily operation
It produces Maji Safi, our own drinking water brand, in Kampala.

5	10	500–20,000	WHO · EAS

MACHINE MAKER AND SYSTEM INSTALLER

Design	Build	Test	Install	Operate
from the water test	by our engineers	in the factory and on site	connected and commissioned	trained operators

TWO WAYS TO WORK WITH US

OPTION 1
You buy the system

- ✓ We design, build and install it for your water.
- ✓ We train your operators.
- ✓ We service it: filters, membranes, lamps and water tests.

OPTION 2
We own and run it

- ✓ We install the system on your site.
- ✓ We operate, maintain and test it.
- ✓ You get safe water every day, without running a plant.

WHAT WE DO

Safe water from every common source.

Every project starts with a water test. The water type sets the treatment.

Clear town and piped water

Filters › Carbon › UF › UV

Groundwater iron, manganese, bacteria

Filters › Iron removal › Carbon › UF › UV

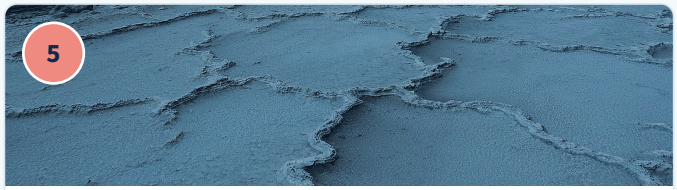

Surface mud and E. coli

Filters › Carbon › UF › UV › Chlorine

Fluoride Rift Valley groundwater

Filters › Fluoride media › Carbon › UF › UV

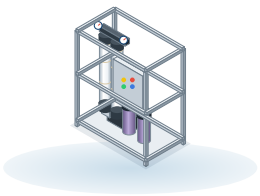

Saline salty, brackish water

Filters › Carbon › Salt membranes › UV

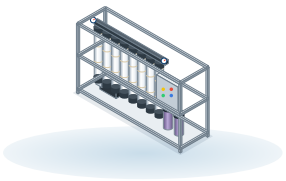

HOW TO READ

Each line shows the treatment steps in order, from raw water to safe drinking water. UF removes germs and cloudiness and keeps healthy minerals. UV disinfects; chlorine protects water in storage.

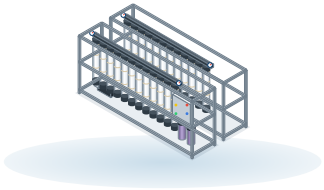

OUR SYSTEMS

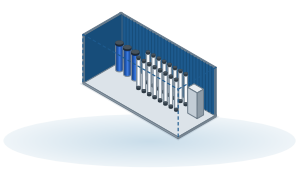

Safi S
500–1,000 L/h

Safi M
2,000–4,000 L/h

Safi L
10,000–20,000 L/h

Containerised
built to order

PROOF AND PLANS

Running today. Growing in 2027.

REFERENCE PLANT · KAMPALA

Safi M, rated 4,000 L/h, in daily production.
Lab tested: E. coli and coliforms 0; fluoride, nitrate and lead within WHO limits.
UNBS certified to US EAS 153:2014.

WHAT MAKES US DIFFERENT

We run our own plant, so every system is proven in daily production.
Treatment matched to the water, not one machine for all.
Local build and service, close to the site.

OUR ROADMAP

2026 · now
Kampala plant running
First Safi Treatment system in daily production.

2027
Uganda's big towns
New sites planned in Kampala, Entebbe, Jinja, Gulu, Mbarara and other major towns. Manufacturing starts in Ethiopia with Bejai Group.

2028
East Africa
Expansion to Kenya, Ethiopia and the wider region.

WHO WE SERVE

- **Bottlers and water businesses**
- **Communities and water providers**
- **Schools and health facilities**
- **Institutions, estates, hotels**
