MAJI SAFI IN BELIZE

Our approach: the country, the market, what we can do, and how we could set up. For Amanuel, Mike and Sammy.

Safiflow Ventures Group · Oct 2026 · Draft for discussion

Belize already buys its water. Nobody sells it a spring. We can.

74%
of homes buy their drinking water: about 82,000 homes

BZ$51M
a year spent on home water jars (our estimate)

552K
overnight visitors a year, 69% from the US

0
spring water brands. All sellers sell purified water.

> **Our approach:** a partner's spring in Belize, treated with our Safi Treatment systems, sold as **20 L jars** (same jar as Maji Safi, new label) and **cans**, with a small bottle as an option. We work with local players where it helps. A North American company handles the deals.

We bring

- Treatment systems
- A running plant model
- Jar and delivery know-how

Moving parts

- Investment and partners
- Spring and lab tests
- Costs and logistics

Open to discuss

- Brand name
- Deal structure
- First plant size

SIB 2022 Census · BTB 2025 · market estimate: 82,264 homes × 2 jars/week × BZ$6 · all sources in the data notes

PAGE 2 · BELIZE AT A GLANCE

A small country with a big visitor economy, next door to North America

397K
people · 110,719 homes

US$3.6B
GDP (2024), grew ~8% in 2024

60%
of foreign currency comes from tourism

552K
overnight visitors (2025)

967K
cruise visitors (2025)

2 : 1
BZ$ to US$, fixed · English-speaking

What drives the economy

- **Tourism:** the biggest earner, mostly Americans
- **Agriculture and fishing:** sugar, bananas, citrus, seafood (~8% of GDP)
- **Trade, transport, outsourcing**

What it means for us

- Visitors want premium water, often in cans
- US dollars and English make deals with North America easy
- Growth slowed in 2025, so prove demand first

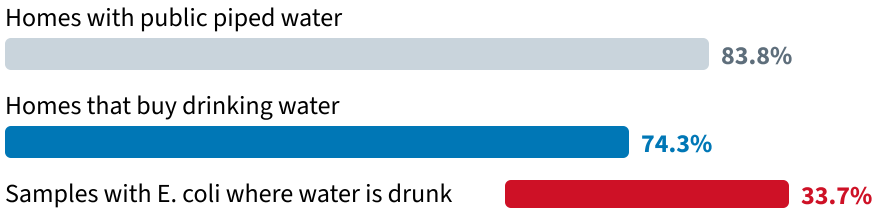

Red: biggest city · Teal: main visitor island

PAGE 3 · HOW BELIZE DRINKS WATER AND HOW BIG THE MARKET IS

Most homes have tap water, yet three in four buy what they drink

Tap reaches homes, trust does not

Why people buy: water gets dirty in storage at home (E. coli was even found in dispenser water). A **sealed jar**, a **clean dispenser swap** and a **named source** win trust.

Is there a clear spring water brand?

No. Every seller we found sells purified (mostly RO) water. Nobody sells a named Belize spring, and nobody sells still water in a can.

Market size (our estimate)

BZ$51M
home jar market a year · 82,000 homes × 2 jars a week × BZ$6

BZ$2.6M
our jars at a 5% share · 428,000 jars a year

BZ$1.0M
our cans at 5% of visitor-days · 248,000 cans

US$1.8M
together, a year in sales at shelf prices, before costs

WHAT A BUYER PAYS	PRICE	PER LITRE
Crystal 5-gallon jar	BZ$6	**0.32**
Local 500 ml water	~BZ$1.25	2.50
Coca-Cola 12 oz glass	BZ$1	2.82
Water in visitor areas	~BZ$3	6.00
Imported can (La Croix)	~BZ$4	**11.27**

SIB 2022 Census · SIB/MoHW/BWS MICS7 statement, Nov 2025 · San Pedro Sun 2024 · Love FM · Luna Realty 2022 · estimates are ours; shelf prices to be confirmed in Belize

PAGE 4 · WHO IS IN THE MARKET, AND WHO WE COULD PARTNER WITH

One big group, many small plants. Partners, not only rivals.

CRYSTAL · BOWEN & BOWEN

National leader · 4 water plants · line fills 22,000 bottles an hour · BZ$40M facility (2016) · Belize's largest employer · also bottles Coca-Cola and brews Belikin

Coca-Cola

Bottled by Bowen & Bowen · BZ$1 drink

ZETA

Belmopan, Corozal · RO + UV · jars, ice

AQUATIC PREMIUM

Orange Walk · home delivery

AQUAZUL

Jars, ice, delivery

BEL AQUA

Bluefield Belize Foods · since 2006

AGUA DULCE

San Pedro · visitor island

FILTER PURE

Home RO systems

REFILL STATIONS

Grocery stores · not audited

Partner ideas

OPEN FOR DISCUSSION

WHO	WHAT THEY HAVE	HOW WE COULD WORK TOGETHER
Bowen & Bowen	Lines, trucks, shops nationwide	Canning or distribution deal for our spring water
Local jar plants (Zeta, Aquatic, Aquazul)	Jars, delivery routes, customers	Fill or deliver our jars in their area; we upgrade their treatment
Filter Pure	RO installs and service	Sell and service Safi Treatment systems
Resorts and hotels	Visitors, bars, boats	First can buyers; own-label water

OUR SPOT

The only named spring, in jars and cans. Sealed, tested, delivered.

Logos: only Coca-Cola's is in hand. The other brand logos get added when we have the files. No public revenue figures were found for the private water companies.

PAGE 5 · MAJI SAFI AS A WATER TREATMENT COMPANY

We design, build and run treatment, and we sell our own water

SAFIFLOW VENTURES GROUP

The parent company: water treatment technology. Design, build, install, service.

MAJI SAFI

Our water brand. Plant running daily in Kampala at ~6,000 L/h. Zero E. coli in accredited lab tests.

SAFI TREATMENT

Our system family: 10 modules, 500 to 20,000 L/h. Built to East African Standards (EAS 153, 39, 38).

All our treatment systems

SYSTEM	FLOW	PER DAY (10 H)	FITS BELIZE FOR
Safi S	500–1,000 L/h	5–10 m^3	A small pilot, a resort, a village
Safi M (our Kampala plant)	2,000–4,000 L/h	20–40 m^3	The first spring plant: jars + cans
Safi L	10,000–20,000 L/h	100–200 m^3	A national hub, if demand grows
Containerised	To design	To design	Shipped ready to run; remote sites

Small systems near customers, like our Kampala model, mean less trucking of heavy jars.

SIZE OPEN

What we can treat

Clean spring / town water
Filters › UF › UV

Iron and manganese
+ iron media

Rivers, cloudy water
+ chlorine

Fluoride
+ fluoride media

Salty water › salt membranes (then it is "purified", not spring)

For a spring: micron filters, then ultrafiltration (0.01 µm), then UV. Germs out, natural minerals kept, no chemicals.

PAGE 6 · WHAT WE SELL FIRST

Start with 20 L jars and cans. Same jars as Maji Safi, new labels.

OPTION A · MAJI SAFI BLUE

20 L jar · first | **Can · first** | **Bottle · optional**

OPTION B · A BELIZE SPRING NAME, MADE BY MAJI SAFI

Jar | **Jungle can** | **Flag can**

Jars, the Oasis and Primo way: a dispenser in the home, a full jar swapped on a fixed day, ordered on WhatsApp. Repeat buyers every week.

Cans for visitors: resorts, bars and boats. No plastic bottle. Belize's deposit law already covers cans.

Brand: Option A or B DECIDE LATER, after trademark checks. Designs are concepts.

Concept mockups by Maji Safi · Primo Brands and Oasis Water (South Africa) models · Returnable Containers Act Cap. 328:01

PAGE 7 · DEAL, MOVING PARTS, IMPACT AND NEXT STEPS

How we could set up, what it takes, and the story we tell

THE DEAL (MY THINKING)

A **North American company** handles the deals and the Belize brand, because that side of the world knows how North America works. Who owns what is **open for discussion**.

Partners: Maji Safi (treatment, plant, operations) · the Belize partner (spring and land) · an investor · Mike leads the Belize side.

Moving parts

Investment: find who will partner and fund it

Tests: spring water lab tests (wet and dry season) and flow

First cost analysis: machines, site, cans, jars. Prepared with Mike

Logistics: shipping machines and cans, site, roads, power

Permits: water licence, bottled water standard BZS 10, company setup

Social impact stories

Every can, a school tap. Only 58.3% of Belize schools have drinking water; part of every can funds safe water at schools.

Refill, not plastic. Plastic is 67% of Belize litter; one refilled jar replaces dozens of bottles.

Clean water for villages. About 20 rural villages lack basic water systems; Safi Treatment can serve them.

Local jobs at the plant, on delivery routes and in sales.

Next: 1 · Spring test and site visit → 2 · Cost analysis and logistics → 3 · Partners and investors → 4 · Launch jars, then cans
